

# Trailer Mounted Glycol Shell and Tube Heat Exchanger

For Safe and Controlled Pipeline Commissioning and Decommissioning

## Features

- Fully self contained unit allows heat exchanger and flow control valves to be monitored and operated from operator's cabin
- Shell and tube heat exchanger indirectly heats product to ideal conditions while pressure and temperature from all points in the process are monitored
- Safety shut downs for high temp, loss of oil pressure, loss of blower belt, and gas detection

## Design Highlights

Heating Capacity:	6 Mmbtu/hr
Working Pressure:	1800 psi
Inlet / Outlet:	2" 1502
Typical Flow Capacity:	45,000 lbs/hr
Length (overall trailer):	48'
Width (overall trailer):	8.5'
Weight(on trailer):	45,000 lbs.
